Fire

Myth: It is normal behavior that children should have. **Fact:** NO! In fact, it is dangerous behavior that causes billions of dollars in property loss every year.

Myth: Firesetting is a phase that children go through. **Fact:** It is not a phase. If a child sets a fire, it will continue to be a problem.

Myth: If the fire is small, they can quickly put it out. **Fact:** All fires start with a small fire. If not contained, it can become a major problem and cause a more widespread fire.

Myth: Children are naturally curious about fire. **Fact:** Almost all children are curious about fire. But curiosity is a symptom of a more widespread problem.

Myth: Children are naturally curious about fire. **Fact:** There are many reasons why children are curious about fire. It could be a symptom of a more widespread problem, such as a mental health issue or a learning disability.

Myth: Children are naturally curious about fire. **Fact:** Curiosity about fire is not a normal part of childhood.
