New Gymnasium Wing Grows (Nov. 9 - 13)

The cinder block masonry walls continue to grow around the new gymnasium wing. The locker rooms that will serve both Physical Education and the athletics teams are now nearly enclosed.

[A group of students will get an up close view of the construction process at Roosevelt when James Duckworth's Intro to Construction class takes a field trip tour of the site later this week.](#)

Equipped with safety equipment and loaner boots generously donated by members of Lease Crutcher Lewis, Electrical Construction (EC Co.) and Heery International, students will see a number of trades at work between the masonry, concrete, electrical, and plumbing crews currently collaborating together on the new wings. We look forward sharing this exciting learning opportunity.
