

ROOSEVELT

CONSTRUCTION NEWSLETTER

Thanks to Roosevelt High School for your support in helping to get school open in time for faculty and students! The first assembly was a great response to the countless number of hours and hard labor that went in over the course of the last 17 months to get this completed. The Auditorium is still under construction with interior finishes and rough-in work taking place along with the associated Black Box. The New Commons interior finishes are moving forward and substantial progress should be made over the next few weeks. On the south side of campus the existing 1921 Building also known as Area B2 is wrapping up demolition and abatement, so seismic shearwall work can begin. Once again we appreciate your patience during the construction process and will continue to work with campus on minimizing noise and interruptions as we can.

Sincerely,

Michael C. Kingham
Senior Project Engineer, Roosevelt High School Modernization
